

Accelerate the Work that Matters Most

Project Management Fundamentals for Nonprofits

A one-day, dynamic workshop filled with practical tools to maximize your nonprofit's impact with smart project management

Develop a Culture of Smart Project Management Across Your Organization

- Are you and your teams productive or just busy?
- Do you start projects with enthusiasm but soon find them behind schedule, over budget, with an unclear scope, or stalled completely?
- Does your organization waste valuable time and resources trying to track and communicate the status of its projects?

Organize Projects So That Your Efforts Have the Most Impact

For nonprofits to successfully carry out their missions, they must strategically manage their time and resources. Any nonprofit, regardless of size or budget, can benefit from applying project management tools and techniques to their many projects, including:

- Strategic-plan goals
- Fundraising events
- New services, programs, grants
- Capital campaigns
- Office relocations
- New internal processes and systems

Successful Projects Take More Than Good Intentions

You will leave this eight-hour course with proven project management tools and materials designed to share with your teams and start improving your project success rates the very next day.

Course Highlights

- Ten keys to project success
- The Triple Constraint
- Managing multiple projects successfully
- Project selection considerations
- Case studies
